## New On-Street Spaces

As growth and demand for parking increases, it is important to identify any potential parking spaces in the downtown area. City staff has worked on design concepts for several street blocks where potential on-street parking spaces can be added or identified.

The street blocks include:

- Arch Avenue – From Broad Street to Federal Street
- Broad Street – From Willow Oak Plaza to Arch Avenue
- Federal Street/Church Street
- Lumos Plaza – From Wayne Avenue to Arch Avenue
- Main Street 600 Block – From Maple Avenue to Church Street

For purposes of this analysis, all of the concepts presented here are considered conceptual at this point. The intent is to facilitate strategic planning for future public parking and to raise awareness of the opportunities, challenges and costs that might be involved. If the City were to move forward with a concept, further refinements of design and costing would need to take place.

- questions*
- *Which options seem like good ideas and which do you have concerns about?*
  - *Are there other places the city could get additional spaces?*
